Retaining Walls • Concrete Sleepers • Concrete Blocks • Wall Cladding

WHY CHOOSE STONEWARE™ OVER CONVENTIONAL CONCRETE PAVERS

When it comes to paving, APC Stoneware™ pavers are ready for anything your lifestyle will throw at it. If you're looking for an option that offers more than conventional concrete pavers, these are the perfect solution for your outdoor spaces.

APC Stoneware™ pavers have so many benefits. We take you through why they should be at the top of your list for your next paving project.

Consistent thickness means easier to lay

One of the biggest headaches with traditional pavers is the variation in thickness, which leads to uneven surfaces and harder to lay and level. APC Stoneware™ pavers are designed with little to no thickness variation, which means no lipping and tripping and just a smooth, level finish every time. Say goodbye to uneven surfaces and hello to a professional, seamless look!

Easy to lay and cost-effective

We find our Tradie's love APC Stoneware™ pavers because they're straightforward to install. Pavers with thickness variations are notorious for increasing labour costs but that's not an issue here. These pavers are laid using tile spacers, making them firm, movement-resistant and a breeze to work with. If you're a DIYer, you'll also appreciate how quick and easy they are to install - especially the larger 600 x 600 pavers! They can also be laid on a conventional sand base, not just wet-lay.

Perfect for wet or coastal areas

Slip-resistant and salt-resistant, APC Stoneware™ pavers are perfect for areas that see a lot of moisture, such as around pools, or near the coast. Their durability in high-salt environments makes them a great choice for homes close to the beach or in areas with high salt content soil.

No efflorescence or stains - ideal for outdoor entertaining

Tired of dealing with stains or efflorescence on your pavers? APC Stoneware™ pavers don't suffer from either. They're stain resistant, making them perfect for alfresco areas where red wine, BBQ spills and other tough stains you may encounter when entertaining. Plus, you won't need to clean them again after installation, unlike some concrete pavers that require extra scrubbing once laid.

Arrive in perfect condition - no extra pavers needed

Thanks to the careful packaging with high-strength plastic corners and protective cardboard,

APC Stoneware™ pavers arrive dust, dirt and scratch-free. Unlike traditional concrete and clay pavers, which recommend ordering 5% extra to account for breakages. Whilst APC Stoneware™ pavers don't need that kind of backup, you may need some extras but handled correctly, you'll save on both time and money.

Readily available with minimal batch and colour variation

No need to wait for a new batch or worry about matching colours if you need extra pavers later on. APC Stoneware™ pavers are always in stock and have far less batch and colour variation than concrete pavers.

If you run out or need replacements, they're much more likely to match seamlessly with the original batch.

Less weeds, more style

APC Stoneware™ pavers are not only practical but stylish too! With a wider range of colours compared to conventional concrete pavers, you can achieve the look you've always wanted. Plus, due to their size they're less likely to allow weeds to grow through, keeping your space looking fresh and tidy. They are incredibly strong and durable.

Long-lasting and fade-resistant

APC Stoneware™ pavers are built to last. They won't fade or discolour over time, unlike concrete pavers that lose their vibrancy. Their true black pavers, for example, stay black and don't fade to grey like many concrete options. These pavers are a long-term investment that keeps your outdoor areas looking as good as new for years to come.

WHY CHOOSE STONEWARE™ OVER CONVENTIONAL CONCRETE PAVERS

Easy to maintain and clean

Keeping APC Stoneware™ pavers clean is a breeze. A quick hose down is all it takes to bring them back to life. Their ability to stay clean for longer makes them an easy to care for option, ideal for busy households. What's more, they require minimal maintenance and no sealing is required so they are even easier to look after!

The Trendsetter in Paving

Concrete pavers may have been popular once, but APC Stoneware™ pavers are the future. They offer all the benefits of modern materials with none of the drawbacks of traditional concrete. So, if you're looking for a stylish, durable and low-maintenance option, look no further than APC Stoneware™.

Matching coping and tiles - create a seamless look

Our APC Stoneware™ pavers come with matching indoor tiles and a range of pool coping which means, you can use the same product inside and outside your home, in all spaces to create a complete cohesive look! Our stylish coping will elevate the look of your pool while providing you with all its benefits such as salt, stain and slip resistance.
